

# Project Portfolio

## Nelson Santos

IT Operations • Infrastructure • Cybersecurity • GRC (ISO 27001 / NIS2 / DORA)

This document summarizes selected projects across Microsoft ecosystems, networking/perimeter security, endpoint security, business continuity, and compliance programs.

Cloud & Microsoft

Security & Resilience

Governance & Compliance

# Projects

A curated list of projects (reverse chronological).

|  |  |                                 |
|--|--|---------------------------------|
| 2025   | Coordinator and Implementer            | Various                         |
| NIS2 / ISO27001:2022 implementation (4 clients)  | 2023                                   | Project design, Management a... |
| <p><b>Technologies:</b> Auditing, GRC</p> <p><b>Outcome:</b> ISMS ISO 27001 implementation (Logistics, PT); NIS2 implementations (Environmental, PT; Financial sector)</p>   | 20 locations interconnected with UniFi | Various                         |
| <p><b>ISO 27001 and NIS2 Projects</b></p> <p><b>Technologies:</b> Governance and Compliance</p> <p><b>Outcome:</b> Compliance progress in public and private entities</p>  | 2020                                   | Project design / Manager / I... |
| <p><b>Implementation of multiple firewalls (Sophos, WatchGuard)</b></p> <p><b>Technologies:</b> Sophos Firewall, WatchGuard, VPN, IPS, Web filtering</p> <p><b>Outcome:</b> Perimeter security improvements across clients</p>       | 2019                                   | Coordinator / Implementer       |
| <p><b>Start of ISO 27001 &amp; NIS projects</b></p> <p><b>Technologies:</b> ISO 27001, Risk management, ISMS, NIS</p> <p><b>Outcome:</b> First clients progressing toward compliance</p>   | 2018                                   | Implementer                     |
| <p><b>Implementation &amp; recovery of 3 servers (Windows 2012)</b></p> <p><b>Technologies:</b> Windows Server 2012, StorageCraft, Backup/DR</p> <p><b>Outcome:</b> Server recovery and service restoration</p>                      | 2018                                   | Manager                         |
| <p><b>Endpoint migration: TrendMicro WorryFree → Panda AD360</b></p> <p><b>Technologies:</b> TrendMicro WorryFree, Panda AD360, Endpoint policies</p> <p><b>Outcome:</b> Successful migration across multiple workstations</p>       | 2017                                   | Institute                       |
| <p><b>Ransomware recovery &amp; Kaspersky deployment</b></p> <p><b>Technologies:</b> Windows Server 2008, Windows 7, Kaspersky, DR/restore</p> <p><b>Outcome:</b> Recovered 10 servers + ~400 workstations; incident remediation</p> | 2017                                   | Manager / Implementer           |

|      |   |  |      |   |  |                            |
|------|---|--|------|---|--|----------------------------|
| 2016 | Management and 3rd line support   |  | 2015 | Management and Implementer  |  | Banking                    |
|      |   |  |      |   |  |                            |
|      | <b>Migration from Asterisk to IPBRICK</b>   |  |      | <b>Lync Communications Project (Banking &amp; private sector)</b>                                   |  |                            |
|      | <b>Technologies:</b> IP Telephony, VoIP, Ticketing  |  |      | <b>Technologies:</b> Lync, Office 365   |  |                            |
|      | <b>Outcome:</b> Internal IT team leadership (4 support technicians)                         |  |      | <b>Outcome:</b> National collaboration with Microsoft   |  |                            |
|      |   |  |      |   |  |                            |

|      |   |  |      |   |  |                            |
|      | <b>Business Continuity Plans</b>  |  |      | <b>Migration to Office 365 (~3000 users)</b>  |  |                            |
|      | <b>Technologies:</b> BCP/DRP design, testing and validation                                 |  |      | <b>Technologies:</b> Exchange Online, SharePoint  |  |                            |
|      | <b>Outcome:</b> Successful external audit validation  |  |      | <b>Outcome:</b> Cost reduction reported of ~35%   |  |                            |
|      |   |  |      |   |  |                            |
| 2009 | Project design, Management a...   |  | 2005 | Project design, Management a...   |  | Various (Insurance, Log... |
|      |   |  |      |   |  |                            |
|      | <b>Migration to BPOS</b>  |  |      | <b>ISA / Forefront TMG Installation</b>   |  |                            |
|      | <b>Technologies:</b> Exchange, BPOS   |  |      | <b>Technologies:</b> ISA / Forefront TMG  |  |                            |
|      | <b>Outcome:</b> Successful transition to cloud services (saving ~€30k/year)                 |  |      | <b>Outcome:</b> Improved security for websites and email services (spam filtering improved by ~70%) |  |                            |
|      |   |  |      |   |  |                            |
| 2004 | Project design, Management a...   |  | 2003 | Implementer   |  | Architecture               |
|      |   |  |      |   |  |                            |
|      | <b>Complete Infrastructure (project creation, cabling to turnkey service delivery 100%)</b> |  |      | <b>Exchange 5.5 to 2003 Migration</b>   |  |                            |
|      | <b>Technologies:</b> AD, Exchange, TMG, VMware  |  |      | <b>Technologies:</b> Microsoft Exchange   |  |                            |
|      | <b>Outcome:</b> Multisite network, business continuity                                      |  |      | <b>Outcome:</b> Improved email reliability and security   |  |                            |

## Selected highlights (for interviews)

Three projects with reminder-style talking points.

### Migration to Office 365 (~3000 users) — 2011

- Planned and executed Exchange to Exchange Online migration and SharePoint adoption.
- Stakeholder management with minimal downtime; architecture input and operational handover.
- Outcome: reported ~35% cost reduction and improved scalability.

### Ransomware recovery (10 servers + ~400 workstations) — 2017

- Coordinated response and recovery: restore, validation, controlled service reintroduction.
- Endpoint protection deployment and DR/restore procedure improvements.
- Outcome: services restored and environment stabilized after remediation.

### NIS2 / ISO 27001:2022 program (4 clients) — 2025

- Gap assessment, scope definition, asset inventory/classification; risk assessment and treatment.
- Policies/processes: incidents, access, backups/DR, suppliers, logging/monitoring, awareness.
- Outcome: ISO 27001 ISMS implementation (logistics) and NIS2 progress in environmental and financial sectors.
